PRE-SOAK

FORMULA 574

TECHNICAL DATA SHEET

Low pH Liquid Pre-Soak

DESCRIPTION: Low pH pre-soak designed for use as the low pH detergent or pre-soak in the dual stage wash process.

PERFORMANCE PROPERTIES:

ELIXIR is especially designed for use in frictionless automatics and reduced friction conveyor car washes when used in conjunction with the alkaline step.

Contains a unique blend of acetic acid, solvents, and emulsifiers. Gently penetrates and solubilizes difficult to remove road film and oils.

Enhances the cleaning of glass, chrome, and paint.

Outstanding cleaner without the dangerous ingredients found in most low pH products.

Mild acid — Does not contain hydrofluoric acid, ammonium fluoride, or ammonium bifluoride.

Reclaim friendly.

DIRECTIONS:

Apply in the first pass at a dilution ratio of 1:75 to 1:90.

Apply an alkaline pre-soak, such as Formula 534 Wonder Plus or Formula 576 “The Finisher” in the second pass at 1:64 to 1:75.

Can also be applied as the second step for those who prefer an alkaline/acid dual stage set-up.

A Warsaw Chemical titration kit is recommended to determine accurate strength of solution.

SHIPPING WEIGHT IN POUNDS:

55 Gallon Plastic Drum	499.2 pounds
30 Gallon Plastic Drum	266.7 pounds
15 Gallon Plastic Drum	134.1 pounds
5 Gallon Plastic Tighthead	45.0 pounds

SPECIFICATIONS:

Physical form	Liquid
Color	Yellow
Scent	Lemon
Biodegradable	Yes
pH as is	2 - 3
