CWS-46

LOW PH WHEEL & RIM BRIGHTENER

OVERVIEW

A low pH wheel and rim cleaner that penetrates and loosens mild rust, oxidation, and brake dust from any metallic surface. Provides similar cleaning properties to hydrofluoric acid without the safety issues.

FEATURES

- Removes oxidation, brake dust and mild rust
- Brightens wheels and rims
- Safer than most low pH wheel and rim cleaners

APPLICATION

- Tunnel, rollover & manual
- APPROXIMATE USAGE: 12–20 mL/TIRE 8:1–60:1
- Use proportioner tips (i.e. HydroMinder, Dema, etc.) in conjunction with downstream injection (i.e. Dema, venturi, etc.) to achieve final use dilution.

PACKAGING

5 USG

PHYSICAL CHARACTERISTICS

Ultra-Concentrated

pH (100%): < 2.0

SG: 1.09

TITRATION

Amount: 5ml

Reagent: 0.5N NaOH

Dilution - Drops

10:1 - 60

20:1 - 27

30:1 - 18

40:1 - 15

50:1 - 13

60:1 - 11
